

Sustainable tableware, sourced from India, delivered to the world.
Areca leaf, sugarcane bagasse, and compostable bio cups — for
importers and distributors building a plastic-free future.

ARECA LEAF

BAGASSE

BIO CUPS

The world is moving away from single-use plastic.

Governments across your market are actively phasing out single-use plastic foodservice ware. Foodservice and retail businesses need a reliable, compliant alternative now — not eventually. Ximfol exists to make that transition simple.

Netherlands / EU

The EU Packaging & Packaging Waste Regulation (PPWR) takes effect August 2026, alongside the wider Green Deal and Circular Economy Action Plan.

UAE

Nationwide ban on single-use plastic cups, cutlery, food containers and straws, effective January 2026.

Bahrain

Ministerial Order No. 11 of 2023 mandates that food service businesses transition to biodegradable alternatives.

Canada

The Single-Use Plastics Prohibition Regulations, binding since December 2023, ban foam and several plastic foodservice categories.

Australia

The AS 4736 compostability standard and the Australian Packaging Covenant target 100% recyclable, compostable or reusable packaging.

Saudi Arabia

Vision 2030 sustainability goals; natural fibre tableware offers a genuine cost advantage over PLA alternatives.

3 Regions

Europe, Middle East & Australia

100% Natural

No plastics, no coatings

Home Compostable

Breaks down in 60–90 days

Karnataka, India

Sourced at the origin

Wherever your market stands, Ximfol supplies tableware built to meet it.

Areca Leaf Tableware

Pressed from the naturally fallen leaf sheaths of the areca palm — no chemicals, no coatings, no trees cut. Karnataka, India is a global centre for areca leaf production, giving Ximfol direct access to consistent quality and reliable lead times.

A full size and shape range is available — from compact 3.5" dip bowls to 22" x 12" serving trays. Detailed specification sheets provided on request.

Quality, verified at every stage

1

Leaf Selection

Fallen leaves are picked and analysed for thickness, shape and appearance.

2

Heat-Pressing

Pressed into durable, leak-proof shapes — no adhesives, no chemical treatment.

3

UV Sanitization

Treated to eliminate microbial bacteria and mould, extending shelf life.

4

Moisture-Proof Packing

Sturdy, moisture-resistant packaging protects every shipment in transit.

Bagasse Tableware

Moulded from bagasse — the fibrous byproduct left after sugarcane juice extraction. Heat-resistant and sturdy enough for both hot and cold foods without warping or leaking, bagasse is your widest-reach material, with no import restrictions in any major market, including the United States.

Every market we researched — from Canada's federal ban to Saudi Arabia's Vision 2030 procurement standards — names bagasse as an approved, compliant material.

One material, cleared for every market you sell into.

Bio Cups

Compostable alternatives to plastic and standard paper cups, built for hot and cold beverage service. High-frequency, recurring-purchase items — ideal for cafés, events and daily foodservice use, with real demand already confirmed in the Netherlands market specifically.

Compostable

Single-wall, double-wall and ripple-wall constructions are available for hot beverage insulation. Custom branding available on request.

A repeat-order line that keeps your customers coming back.

Built for buyers who've been let down before.

We looked closely at reviews of existing suppliers in this category before building Ximfol. The product concept works everywhere — the execution and communication around it is where buyers have been consistently disappointed.

01**Free Samples, No Obligation**

Evaluate quality firsthand before committing to any order.

02**Flexible Trial Volumes**

Start smaller and scale with you, not ahead of you.

03**Sourced at the Origin**

Karnataka, India — consistent quality, predictable lead times.

04**Custom Branding**

Laser engraving and label options bring your brand to the table.

05**No Chemical Processing**

Natural leaf and byproduct, heat-pressed — nothing added.

06**Responsive, Always**

A real point of contact who answers, always.
